

# FUEL- SAVING TRAILERS

## Aerodynamic Side Skirts

Greatly reduce turbulence underneath the trailer by diverting airflow out and around rear tires.

**+5%** Increase in fuel efficiency\*

## Low Rolling-Resistance Tires

Reduce the amount of energy required to keep tires rotating at highway speeds.

**+1%** Increase in fuel efficiency\*\*

Average price/ gallon of diesel fuel in US

**\$4.99**

2017 2018 2019 2020 2021 2022

## Real-life Savings

A trailer averaging 3,000 miles a month burns 461 gallons of fuel (based on 6.5 MPG). At \$4.50 a gallon, this amounts to a monthly fuel cost of about \$2,100.

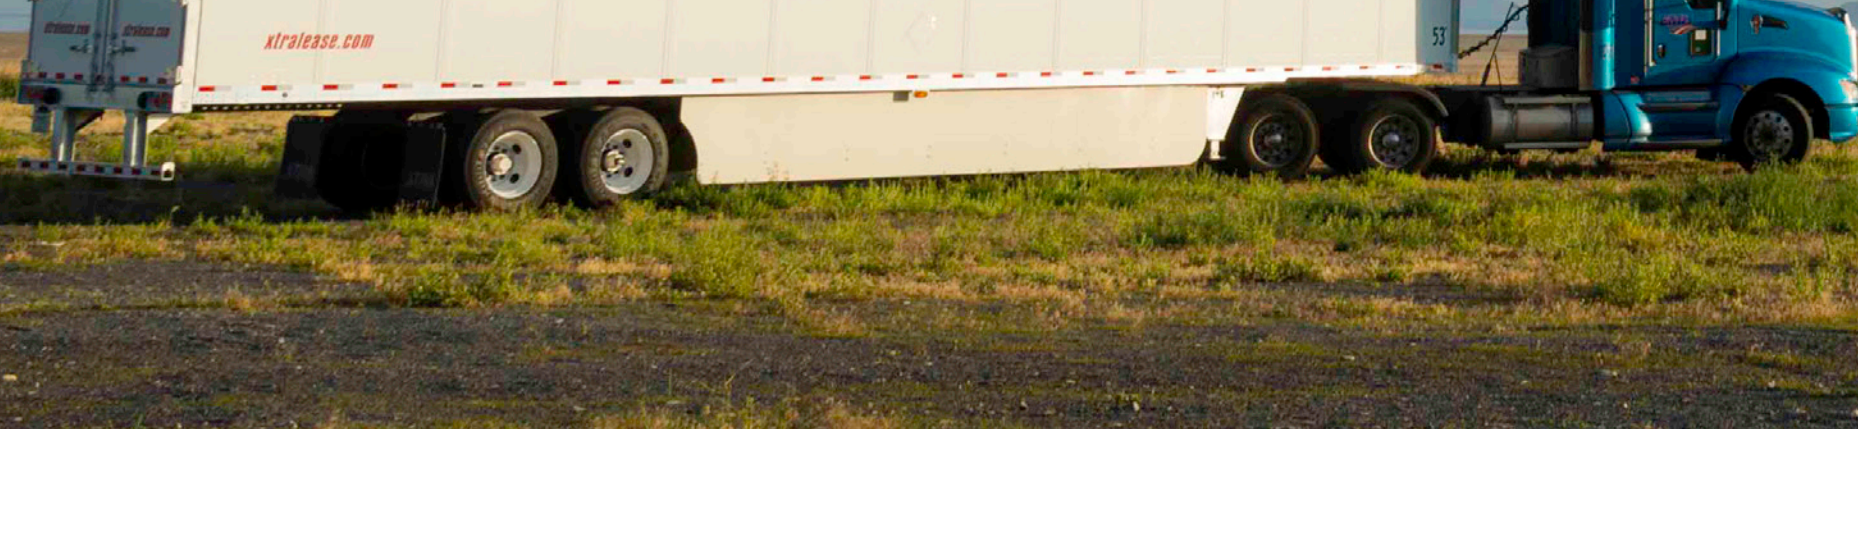

An XTRA Lease trailer equipped with side skirts and low rolling-resistance tires could reduce this cost by 6%, a savings of **\$126 a month!**

Multiply that by the number of trailers you run to see how much your total savings could be.

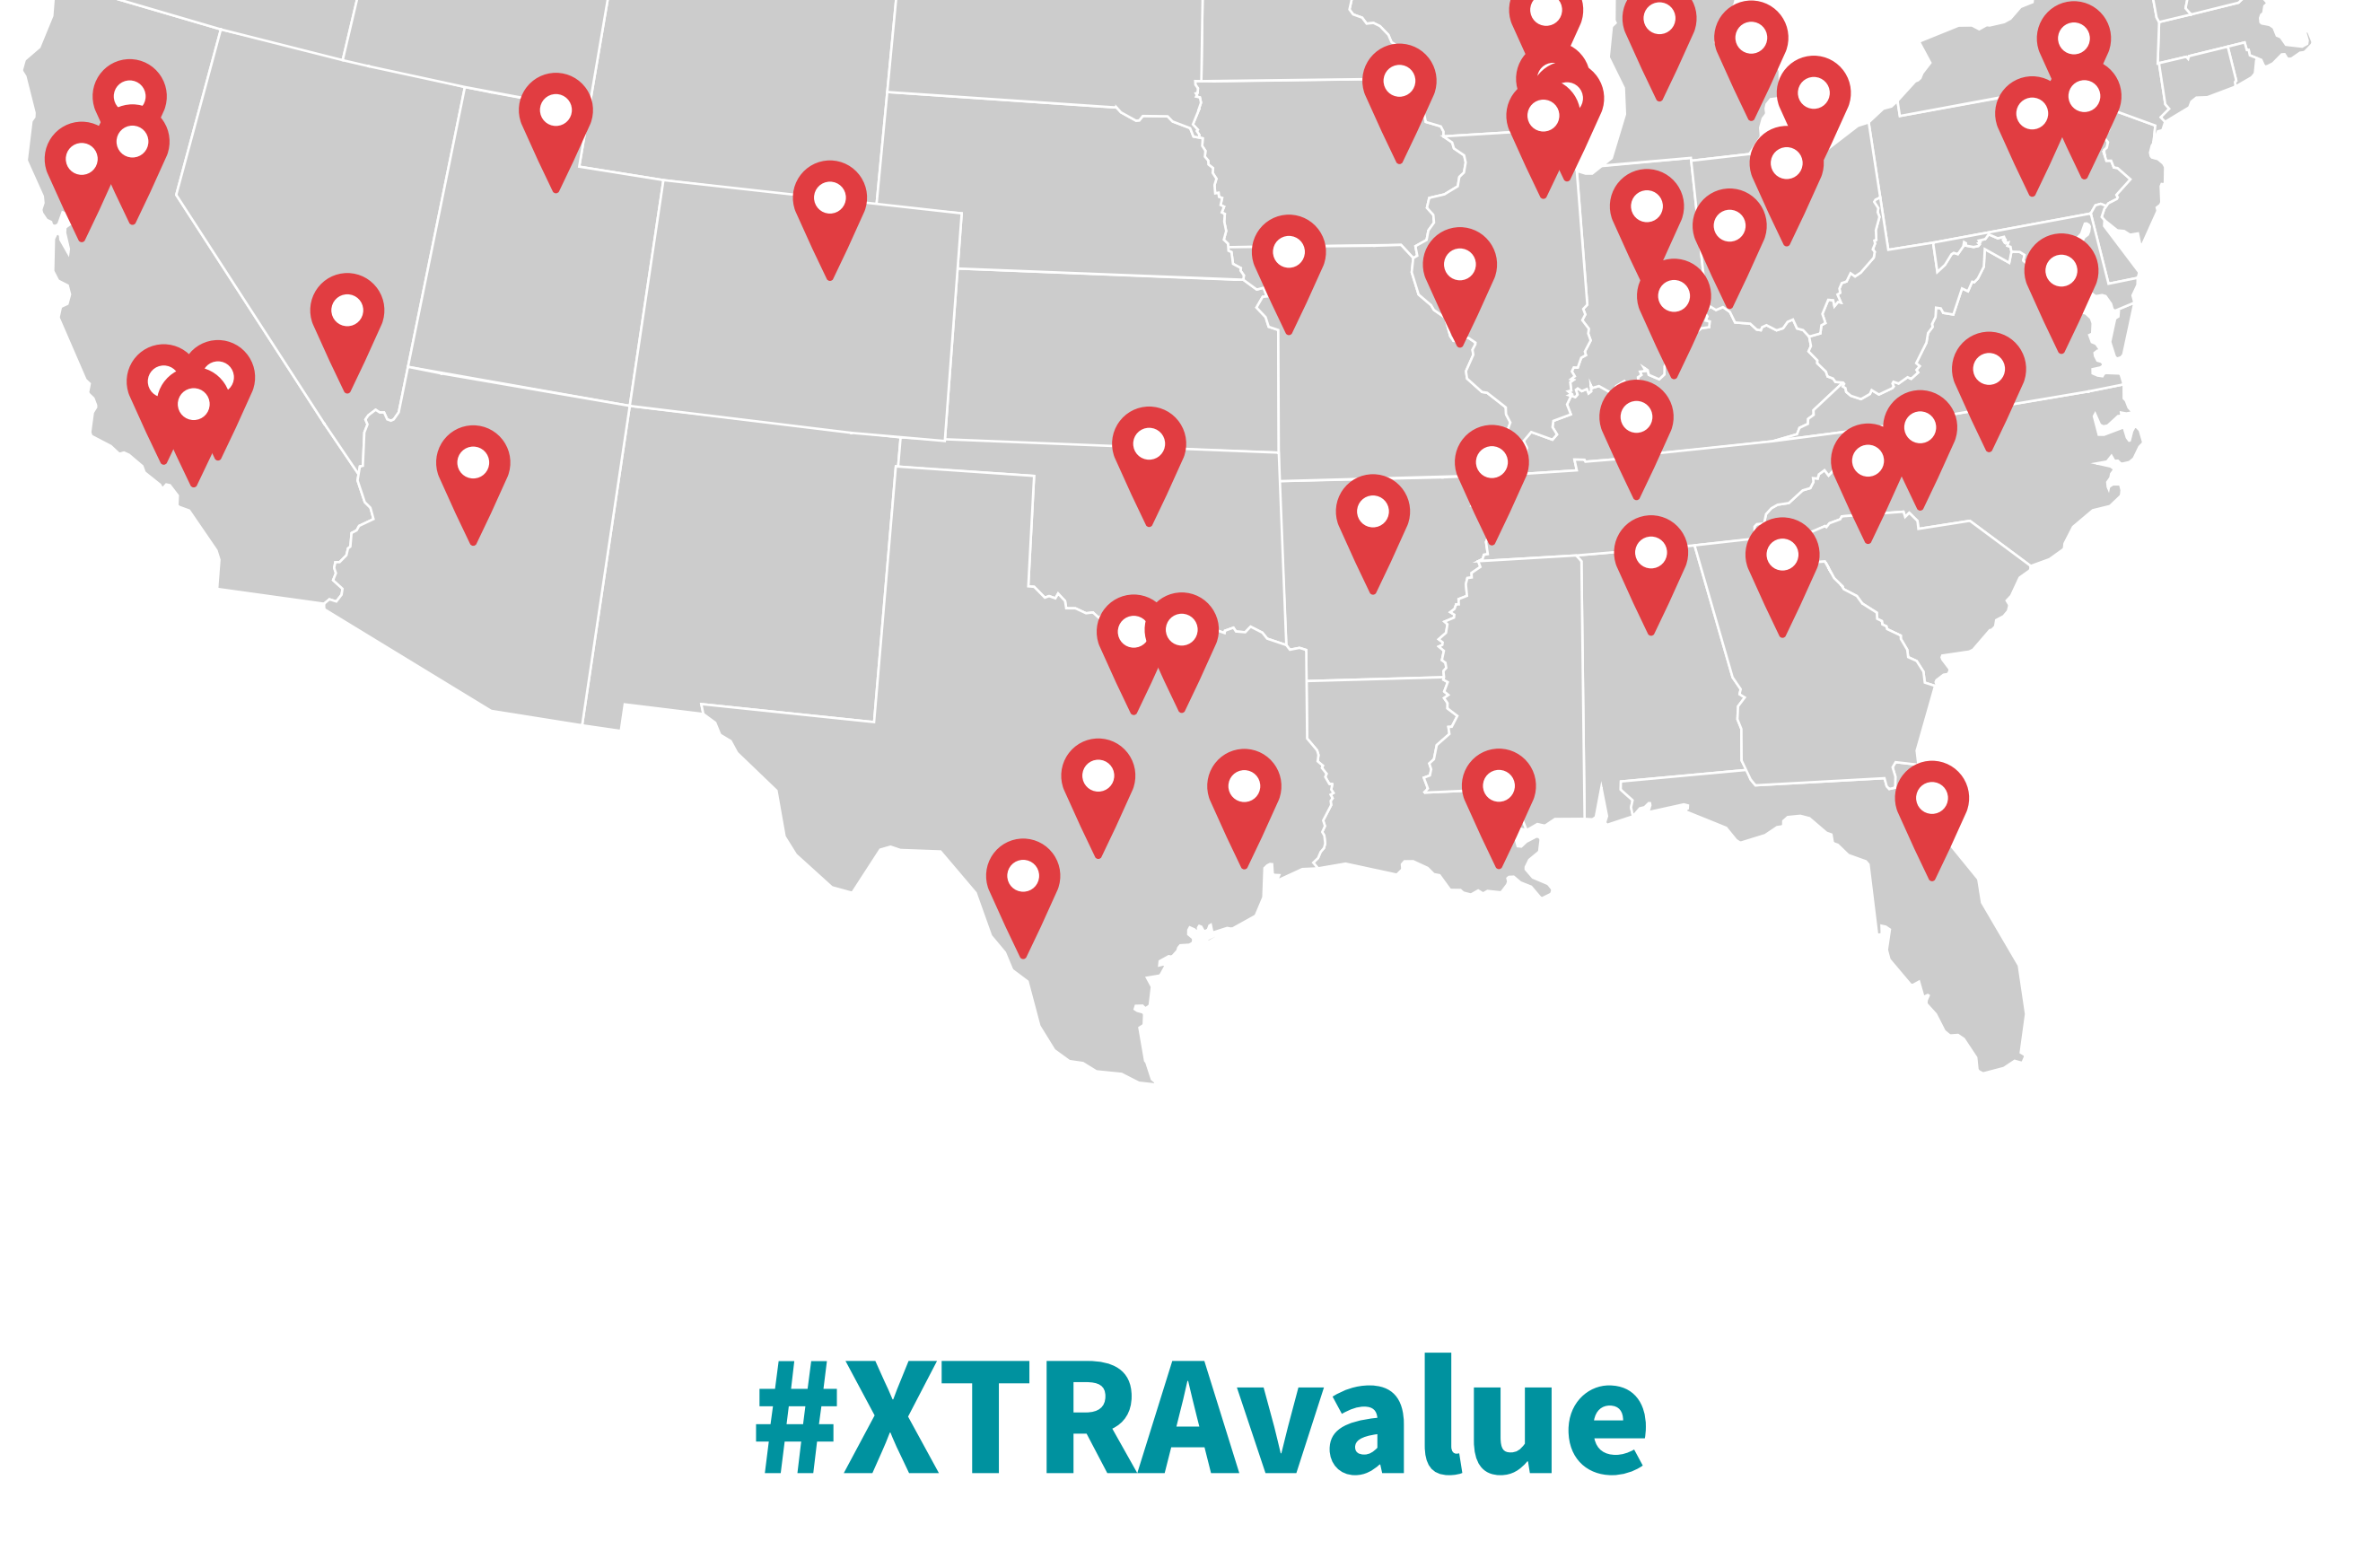

Calculate your own potential savings using our free calculator.
